

## **MEDICAL TECHNOLOGISTS**

The University of Vermont Health Network - Elizabethtown Community Hospital seeks Medical Technologists (multiple openings) to work at its Ticonderoga campus and perform complex medical laboratory tests for the diagnosis, treatment, and prevention of disease. Duties include, among others: (i) performing clinical testing and associated duties in all Laboratory sections; (ii) processing of specimens in the assigned Laboratory Section following written procedures and documenting action taken on the Laboratory Information System; and (iii) additional functions include daily and weekly cleaning of equipment and work area.

Must have a bachelor's degree (or foreign equivalent degree) in Medical Technology or a directly related field.

Must also be able to work independently on afternoon and night shifts as well as possess an ICHP Visa Screen Certificate, if applicable. Must also be certified by the American Society of Clinical Pathology (ASCP) Board Certification (COP) or the University of the State of New York as a Medical or Clinical Laboratory Technologist or Scientist.

Send resumes, references, and salary requirements to: Michelle Meachem, HR, Director at [mmeachem@ech.org](mailto:mmeachem@ech.org) with "Medical Technologist Opportunity" in Subject Line.
